FREEZER PRO FREEZER TROUSER

FREEZER PRO FREEZER TROUSER

Outer Fabric: P200D Oxford – water-resistant and shower-proof.

Inner Fabric (Heavy-Duty Option): Extra heavy-duty/double-lined padding with a straight-stitched cotton/twill lining.

Inner Fabric (Standard Option): Standard single-lined padding with a straight-stitched polyester lining.

Design: Pyjama-style trousers featuring an elastic waist for a secure, comfortable fit.

Engineered for extreme cold conditions, these freezer trousers are designed to maintain warmth in temperatures ranging from 0°C to -20°C. Meant to be worn with a freezer jacket, they are constructed from insulated nylon, polyester, or other high-performance synthetic fabrics that offer excellent waterproof and windproof protection.

Ideal for workers in the food processing and storage, shipping, and logistics sectors, these trousers provide both durability and comfort in cold storage facilities or outdoor environments characterized by very low temperatures.
